

Supporting Documents for Qualitative Metric 2.3.1

Submitted to NAAC

By

**Gandhi Institute For Technology (GIFT),
Bhubaneswar**

2.3.1 Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

Student centered learning approach is focusing the teaching methods that transforms the instruction from the teacher to the student. It is defined as the extent to which the students are involved actively in constructing new knowledge and understanding. The institution is committed to ensure the development to fits students through a student-centric learning process. Here, the teachers make their classes student-centric where students are in focus and they play the central role. They are actively engaged in the learning process in a collaborative nature along with their peers and under the guidance of teachers. Students engaged in learning activities with their peers are more likely to participate in other effective educational practices and have gained positive views of the active learning environment.

Following are the different strategies employed during the whole teaching-learning process.

2.3.1.1 Experiential learning:

1. Summer Internship: As a part of curriculum, it is mandatory for the students to go for the internship. It is the best way to relate classroom knowledge with practical experience.

Date - 12th may2022
